Valentine's Day Heart Bump Game

© Boy Mama Teacher Mama
all Rights Reserved 2017

Directions:

Give each student 10 unifix cubes/dice or chips and two dice per game board. Players roll the dice and add them together. They put one of their cubes on the sum of the two dice. Next player does the same. If the first player's cube is on the space with the sum, he can "bump" that player off the space. If a player already has his own cube on a space and gets the same roll/sum, he can place a second cube on that space and it becomes "locked" and is out of play for the rest of the game. The goal of the game is to get as many of their cubes on the board as possible in an allotted time OR to cover most of the 11 spaces.
