# Penguin Place Value Game

Print the penguin pages back to back.

Give each pair of players a die.

Player decide which row of penguins will be theirs.

Player one rolls the die one time and decides on which penguin belly to put that number (ones or tens).

Player two does the same.

Player one then rolls again and adds that number on the blank belly of the other penguin.

Player two does the same.

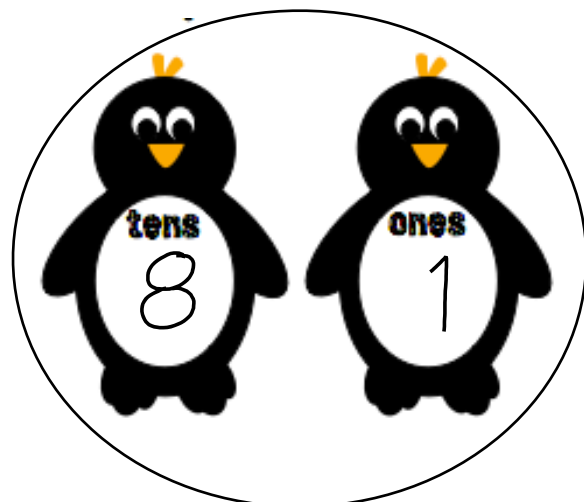

Together, the two players figure out which number created is bigger and circle that number.

Repeat the same steps with the other penguins.
